## Be Strong International's Mission and Impact

For over 30 years, Be Strong International has provided holistic educational services and resources to youth and families, in order to develop heart skills and maintain healthy relationships, moving them from brokenness to wholeness.

We are committed to addressing the social issue of broken families. The family is the basic unit of society, so when families are broken, the result is potential destruction to the communities in which they reside, as well as to the individual family members.

Our vision is to transform communities by enriching individuals and families with effective relationship tools. To date, we have served over 240,000 individuals through specialized programs.

### *Sponsorship Opportunities*

Throughout the year, we host several fundraising and community events. The proceeds received in these events allow Be Strong International to expand our mission and commitment of service to individuals and families living in South Florida.

The Hearts in Rhythm Charity Event is a fantastic opportunity to join our cause. The most prominent philanthropists, bankers, lawyers, business executives and government officials in our community are among our usual attendees.

The highlights of the event include an elegant sit-down dinner with picturesque views of the Miami skyline and waterfront, live music, performances and the presentation of the **Stronger Together Awards**, among other activities. We invite you to partner with us to help reach our fundraising goal.

As a sponsor for this event, your company will receive an enhanced benefits package, crafted to provide you with meaningful recognition, in gratitude for your kind gift.

#### **TABLE SPONSOR: \$2,500**

Your sponsorship can positively impact 50 youth by providing free after-school care, offering homework help, and enrichment activities like dance, photography, cooking, and podcasting. This program provides a safe space for students to thrive and gives parents the confidence to work knowing their children are supported.
